MOUNT EVEREST
8,850M / 29,035FT
During the spring season of 2021, Adventure Consultants will operate its 27th expedition to Mount Everest via the South Col from Nepal.

This expedition will bring together the very best components in high altitude guiding to attempt Mount Everest. Calling on our many years of experience, our very qualified guides and Sherpa crew offer the most seasoned team in the industry and the most professionally run expeditions available. We can quite confidently say that our expedition offers you the most resources, the highest guide/Sherpa-to-client ratio with the best equipment, food and Base Camp support of any expedition operator, making Adventure Consultants the best value for money.

If you have a desire to stand on the highest summit in the world, this is an exciting opportunity and Adventure Consultants can provide you with an excellent chance of achieving that goal. We believe the ascent should be made in the best style possible, a philosophy that has seen us help our expedition members achieve many successful ascents and given us the best reputation in the arena of high altitude expedition guiding.

THE ADVENTURE CONSULTANTS
EVEREST TEAM

LOGISTICS

The 2021 expedition is being organised by Guy Cotter, the director of Adventure Consultants and a veteran of 28 years of Everest expedition guiding and organisation. With technology constantly evolving, Adventure Consultants have kept abreast of all the new techniques and equipment advancements—encompassing the latest in weather forecasting facilities, equipment innovations and communications systems. Everest is not the place to be with an organisation that is ‘learning the ropes’, there is too much at stake for that. Adventure Consultants expedition staff, along with the operations and logistics team at the head office in New Zealand, provide the highest level of backup and support to the climbing team to maximise your chances of success.
This is coupled with a very strong expedition guiding team and Sherpa contingent, who as you will come to see are second-to-none in the industry.

**EXPEDITION LEADER**

The Expedition Leader is Mike Roberts, an IFMGA New Zealand guide who has led our Everest Expeditions numerous times and has an impressive history on Everest and other expedition peaks around the world. Nine times Mike has summited Mount Everest and on three other occasions has forgone his summit to assist other members. He has successfully led expeditions to Aconcagua in South America, Vinson Massif in Antarctica, Gasherbrum II in Pakistan, Cho Oyu in Tibet and Muztagh Ata in Western China, and has 12 ascents of Denali in Alaska to his name. He has also managed to fit in multiple seasons mountain and ski guiding in the Southern Alps of New Zealand, many seasons in Antarctica as a Field Leader/Guide to the USA Antarctic Program, has worked as a Professional Ski Patroller/Avalanche Forecaster and is a qualified Physiotherapist.

Add Mike’s calm and welcoming personality, and attention to detail into the picture and you have a very personable and experienced guide and Expedition Leader who is passionate about seeing his clients achieving their goals, as is reflected in the accolades he receives from his past clients.

**EXPEDITION GUIDES**

Our international guiding staff are the best in the industry. You will find the Adventure Consultants Mountain Guides companionable and strong expedition leaders with considerable abilities and a willingness to see you achieve your goals. The number of guides is determined by the team size but the normal ratio of guides to members is 1:4.

**Ang Dorjee Sherpa**

Summiting Everest initially with us in 1992, Ang Dorjee has moved on to achieve 29 ascents of 8,000m peaks, including Everest 20 times! His skills as a climber are legendary. Ang Dorjee is originally from Pangboche Village in the Khumbu Valley of Nepal, but he now lives in the USA. He guides on Mount Rainier and leads Aconcagua and Kilimanjaro expeditions for Adventure Consultants. He has guided on our successful Everest 2008, 2009, 2010, 2011, 2012, 2013, 2016, 2017 and 2019 expeditions.

**Lydia Bradey**

Lydia was the first woman to ascend Mount Everest without oxygen in 1988 and after years of personal climbing is now mountain guiding with Adventure Consultants. Her strong personal skills and breadth of experience are a real asset on any trip into the mountains. As well as being a qualified IFMGA Guide from New Zealand she is also a qualified physiotherapist. Lydia recently guided on Everest, Cho Oyu, Aconcagua, Alpamayo, Lobuche East and in Mongolia. In 2008 she guided on our Everest trip, and successfully summited again, 20 years after her first summit! Since then she has guided on Ama Dablam, Kilimanjaro, Carstensz Pyramid, Island Peak, Vinson and the South Pole, as well as summiting Everest again in 2013, 2016 and 2018, and Dhaulagiri in 2017.

**Rob Smith**

Rob Smith has been guiding since 2000. He divides his time guiding between the Antarctic summer seasons
and the greater ranges of the Himalaya. Originally from Omagh, Northern Ireland, Rob is now based in Fort William, Scotland. He has guided for Adventure Consultants for many years and his notable guided ascents include Everest, Vinson Massif, Cho Oyu, Carstensz and Elbrus amongst many others. Rob has summited Everest 5 times and has climbed both the North and South routes.

SHERPAS

Our Sherpa team has dozens of Everest summits between them. Da Jangbu Sherpa is the Expedition and Climbing Sirdar who has summited Everest an impressive 13 times and brings with him considerable knowledge and experience. Because of his leadership, we have a legendary group of Climbing Sherpas who operate in a harmonious atmosphere of cooperation and commitment to the expedition and its members. Our group of Climbing Sherpas is enthusiastic, motivated and regarded as the strongest and most cohesive group of Sherpas on Mount Everest. It is indicative of the reputation that our Sherpa team has earned that Sherpas from other expeditions enthusiastically pursue a future position with the AC team.

Our cooking staff are very well known for the quality of the cuisine they produce and are coveted by other team leaders due to the reputation they have established. We have been developing the personnel within our Sherpa team for 26 years and they are an integral part of the Adventure Consultants Everest Team.

WHAT IT TAKES TO CLIMB MOUNT EVEREST

The South Col route on Mount Everest is not an especially technically difficult climb—nor is it the ‘Yak Route’ some non-Everest climbers have termed it. However, it is imperative that expedition members are well versed in the latest techniques and have experience in the high mountain environment.

What the photographs do not show are the difficulties of operating at these extreme altitudes. It is a physically demanding ascent, requiring enormous determination and stamina. An expedition to Everest is not a place for those who will give up when the going gets uncomfortable or strenuous. Days can be up to 15 hours long and although we have lightened the loads you personally carry by having enough Sherpa support to
carry your equipment, the days are still arduous and taxing, especially over the 7–9 weeks of the expedition.

The outcome of the expedition will be determined by three broad groups of factors. The first is environmental (weather and snow conditions, etc.). The second is the logistical approach taken by the expedition leaders and the strategies employed to embark on a summit bid. The third is your own preparation in the years prior to the expedition and how you perform whilst the expedition is under way. We can help design a training programme that will both physically and mentally prepare you for the climb, but you need to commit the time and energy to ensure you attain the correct conditioning.

We know that the success of an expedition is determined by factors that are planned well in advance of the outset of the actual climbing. During our 26 previous seasons on Mount Everest, we have observed many other groups attempting to climb the mountain. Many try to emulate our strategies without committing to the level of resources that we provide.

Every step of the way, our head office staff will be there to answer your questions. If they can’t, they will be happy to put you in touch with one of our Senior International Guides who will have first-hand knowledge of the climb.

We recognise that no amount of finely tuned organisation will guarantee anyone the summit of Mount Everest. However, we do believe that our experience, combined with your enthusiasm and determination, will provide you with the best possible chance of standing on top of the world. Our track record on Everest is unmatched with 360 summits to date!

**HOW DO I CHOOSE BETWEEN THE VARIOUS EXPEDITION PROVIDERS?**

It is very important to us that the climbers who join our team have expectations that are compatible with the programme we offer and the style of expedition we run. We don’t want to merely ‘fill our expedition’ but instead we want a team made up of companionable people who are focused on reaching the summit in good style with the highest level of support and safety standards, as can be provided by a guiding service on Mount Everest accompanied by the best standards of food and equipment that is attainable.

So, what is the difference between us and the rest? We could make a lot of claims about how much better we are than the rest, but it is our clients who are the best judge. We are happy to put you in touch with some of ours.

[Image: Climbing a ladder in the Khumbu Icefall. Photo: Charley Mace]
our past clients who are so impressed that they have offered testimonials, so please contact us for their contact details.

WHICH ROUTE? NORTH OR SOUTH?

The South Col route from Nepal offers the best chance of success for most climbers. High royalty fees by the Nepalese government have created a large disparity between the costs of Everest expeditions from Nepal and Tibet.

We encourage you to research details about both sides of the mountain. People will argue the virtues of either of the two approaches. However, we maintain that the ‘entire package’ of the Nepal side makes it the preferred option: the delightful approach through the Sherpa homelands via the Khumbu Valley, enjoying Sherpa hospitality in modern lodges with good food and all the while, being impressed by the spectacular scenery of the incredible peaks of the lower Khumbu.

The Khumbu Icefall has a fearsome reputation and it is indeed a phenomenal route to climb. Yet it is an integral characteristic of the South side that it is a ‘Climbers Route’ that requires a mountaineer to be well skilled in the use of crampons and an ice axe. The Western Cwm is renowned for its phenomenal views of Lhotse, Nuptse, Pumori and Cho Oyu, and our Camp 2 is situated directly beneath the imposing black hulk of the notorious Southwest Face. As one climbs higher up the route to South Col, the views become even more outstanding with incredible vistas along the Himalayan chain and out towards the lowlands of Nepal. We ascend 900m/3,000ft from the South Col on summit day via moderate snow slopes with the occasional rock step to climb over. As we approach the South Summit, the dawn breaks to reveal astounding views from Kanchenjunga in the East to Shishapangma off to the West, with all the peaks of the Khumbu well below us. The traverse along the summit ridge is exposed and exciting. When we make our way up the Hillary Step, we can look 2,400m/7,800ft straight down onto our Camp 2 in the Western Cwm and 3,000m/9,800ft down the opposite side of the ridge into Tibet! The summit itself provides ample space for the obligatory summit photo and is a time to reflect on the journey thus far. For many, it is one of the most poignant moments of a lifetime.

After the summit we descend via the same route, losing height quickly and generally we arrive back at the South Col some 3–4 hours after leaving the summit. On the north side, climbers must do a long traverse and it is this feature where climbers cannot lose elevation quickly that can cause the demise of tired climbers, especially those who have run out of oxygen.
We only climb on Everest during the spring season because the weather becomes progressively warmer and the days longer. Winter winds have already scoured away much of the snow, which significantly reduces the snow avalanche hazard as well. Contrast this with the autumn; typically, as the expedition goes on, the days get shorter and colder with more snowfall. Consequently, very few expeditions are undertaken in the fall and those that do have quite a low percentage chance of success.

By the time you first arrive at Base Camp, a route will already be established with ropes and ladders through to Camp 1. Our strong Sherpa team will be busily involved in ferrying loads of equipment up the mountain. After a few days acclimatisation at Base Camp, you will climb through the icefall to Camp 1 and rest there for a day. The following day you will continue up the mellow slopes of the Western Cwm to Camp 2 to rest and acclimatises for several more days. A day-climb up the Lhotse Face towards Camp 3 will complete this first foray before returning to Base Camp. During this time, the guides and Sherpa climbers will be establishing the higher camps and stocking these with bottled oxygen for the summit climb.

The second trip on to the mountain will involve either ‘tagging’ or sleeping one night at Camp 3 for acclimatisation, before returning to Base Camp for a rest period. In a perfect scenario, weather and health would remain constant, and these two trips up the mountain would take around 3 weeks. In reality, factors such as weather can add several days to the acclimatisation process.

The most likely time for our summit climb will be 15–25 May. Previous summit dates have been:

- 10 May 1990
- 12 May 1992
- 10 May 1993
- 09 May 1994
- 10 May 1996
- 23 May 1997
- 15 May 2000
- 16 May 2002
- 18 May 2003
- 27 May 2004
- 19 May 2006
- 21 May 1990
- 24 May 1992
- 19 May 1993
- 22 May 1994
- 24 May 1996
- 19,25 May 1997
- 19,20,21 May 2000
- 19,20 May 2002
- 21,22,27 May 2003
- 16,19 May 2004
- 23 May 2006
- 21,13,19 May 2011
- 19,25 May 2012
- 19,20,21 May 2013
- 19,20 May 2016
- 21,22,27 May 2017
- 16,19 May 2018
- 23 May 2019

We will climb through the established camps with lightweight packs and climb to Camp 4 on the South Col. All climbers will be sleeping on bottled oxygen before setting out for the summit, carrying only very lightweight Russian oxygen bottles and using Summit oxygen masks. Sherpas and Western guides will accompany all members during the summit climb.

**PREREQUISITE EXPERIENCE**

There is no definite measure for assessing the required skill level to climb Mount Everest, so we do like to discuss this on an individual basis. However, there are some broad guidelines that can be applied from the outset.

A successful team member will have been visiting the mountains for at least five seasons and made ascents of peaks up to 5,500–6,000m/18–20,000ft. It is quite common for members to have previously climbed Denali in Alaska, Aconcagua in South America and various Mexican volcanoes as training for Everest.

They will be familiar with crevasse rescue and glacier travel techniques and have a good overall standard of...
fitness. There will ideally be a broad set of climbing skills from basic rock climbing to advanced cramponing on snow and ice, and strong rope skills such as rappelling and rope ascending.

Age itself is no barrier. To date, we have succeeded on Mount Everest with members aged from 20 to 66 years of age. A fierce determination and a burning desire to climb the mountain are essential prerequisites for this expedition. The guides and other expedition staff will provide the leadership, tactics and overall decision-making required during the climb, but you will still have to physically put one foot in front of the other to make it to the top and back.

We recommend that prospective members undertake another expedition with us before attempting Mount Everest. Your ability to reach Everest’s summit may be dictated by your understanding of how your body responds to very high altitude and ascending other less demanding peaks at high altitude will increase your confidence and enhance your judgement during summit day on Everest. For example, Cho Oyu from Tibet is an excellent venue to learn about the problems of extreme high altitude, without the time or financial commitment that Everest requires.

**TEAM SIZE**

The team will have a maximum size of 3 guides and 12 members.

The Base Camp will be staffed by a medical doctor, Base Camp manager and Sherpa kitchen crew, usually totalling 7–10 people depending on group size.

A team of between fifteen and twenty Climbing Sherpas will carry loads and support the summit climb. Adventure Consultants have a ratio of at least one Sherpa for each team member or guide per person on summit day.

Sherpa cooks will occupy Camp 2 in the Western Cwm for the duration of the expedition. Their role is not only to provide us with tasty meals but also to maintain the integrity of Camp 2 during inclement weather. Often our assistant cook will trek down to meet us en route from Camp 1 with tea or juice!

**ITINERARY**

Following is an ideal itinerary for our Everest Expedition:

<table>
<thead>
<tr>
<th>Date</th>
<th>Activity</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 April</td>
<td>Arrive Kathmandu, Nepal</td>
</tr>
<tr>
<td>2 April</td>
<td>Kathmandu preparations</td>
</tr>
<tr>
<td>3 April</td>
<td>Fly to Lukla</td>
</tr>
<tr>
<td>3–13 April</td>
<td>Trek to Base Camp</td>
</tr>
<tr>
<td>14 April–4 May</td>
<td>Establish camps and acclimatise</td>
</tr>
<tr>
<td>5–12 May</td>
<td>Rest Period</td>
</tr>
<tr>
<td>13–25 May</td>
<td>Summit Climb Period</td>
</tr>
</tbody>
</table>

---

Adventures and expeditions are full of stories and moments that are best described in pictures. Here are some of our favorite shots from previous expeditions.

**Climber negotiating ice blocks in the Khumbu Icefall.** Photo: Guy Cotter

**Adventures and expeditions are full of stories and moments that are best described in pictures. Here are some of our favorite shots from previous expeditions.**
26–27 May  | Clean up and depart Base Camp
27–31 May  | Trek to Lukla
1 June     | Fly from Lukla back to Kathmandu
2 June     | Depart Kathmandu

Please arrive into Kathmandu by mid-afternoon of April 1 as we have our first team briefing that very evening. Our permit for climbing Mount Everest allows us to stay on the mountain into June. We strongly suggest that you keep your homeward flight open dated and flexible so that we can extend into the latter part of May for a summit attempt if need be. We have June 2 as the probable finish date for departing from Kathmandu.

**OXYGEN**

AC provides a high flow oxygen package for all team members included in the expedition fee.

Many have found this critical to their success on Everest and we have seen our summit rate increase dramatically with its use. The response from our team members has also been phenomenally positive. Climbers have reported having better energy levels, a better appetite, more warmth, a higher degree of strength and greater enjoyment on summit day.

We also ensure we have enough oxygen to wait a day at the South Col and Camp 4, before attempting the summit.

Our recent experiences show that for those who really want to maximise their chance of success, then these high oxygen flow rates allow the best option for ensuring you only need to attempt Mount Everest one time!

**FAST TRACK**

We are also able to offer a ‘Fast Track’ programme for climbers who wish to maximise their time and able to pre-acclimatise prior to arriving in Nepal with a system such as Hypoxico.

Under this programme you will fly directly from Kathmandu to Pheriche. From Pheriche, we will undertake an acclimatization climb of Lobuche (6,119m/20,075ft) before continuing onto Everest Base Camp on foot, where we will convene with the main team for their second rotation on the mountain.

The perfect option for those on a limited
timeframe, please see our webpage at [https://www.adventureconsultants.com/expeditions/seven-summits/everest-fast-track/](https://www.adventureconsultants.com/expeditions/seven-summits/everest-fast-track/) for further details.

The minimum team size for this option is 2.

**OTHER SERVICES**

Another service we now include in the expedition price is ‘Additional Sherpa Support’. This enables climbers to forego the carrying of heavy packs, which is often very debilitating at high altitude. For some climbers, the long climb with a pack up to the top camp at South Col can leave them too exhausted for summit day and hence this service greatly enhances your summit opportunity.

We are also able to offer Privately Guided Expeditions where you have the services of a top AC Western Guide, as well as your own Sherpa support team to work exclusively with you on the expedition to ensure your needs are best met. AC has been fortunate to work with many privately guided groups over the years with exceptional results.

You may also like to talk to us about other options such as an Everest Traverse South–North, personal communication systems, helicopter upgrade or the provision of a personal tent on the mountain.

For more information on these additional services, please contact our office for details.

**YOUR HEALTH**

AC provides a dedicated doctor at Base Camp for the whole team as standard. Most other teams use a generic medical provider, whilst our doctor is there primarily for you and your team mates. The doctor will monitor your overall health throughout the expedition and our medical equipment and provisions are there to provide for your health care needs.

Ample resources will be on call to support every climber, not just the first team or fittest members. Remember, this is an expedition led by guides who have already climbed Everest and whose job it is to look after your interests. This should not be confused with a ‘professionally led’ expedition, where often you may be buying a place in a team with fewer support services and led by climbers who are attempting the summit primarily for themselves. There are also ‘Sherpa led’ expeditions where you are placed in the hands of a Sherpa for the climb. This can seem alluring, especially when some expedition operators will encourage you to join so they can fill their available spaces, but all too often these are expeditions with over 20 members! The Sherpas are not trained in medical techniques and are often reluctant to act effectively in situations requiring urgency. This is where the skills and experience of your Western Guide become invaluable. Too often expedition members find out the deficiencies of their guides/operators when things begin to go wrong and that is usually too late.
**VISAS**

Expedition members will need to arrange their own entry visa into Nepal. This can be organised by a Nepalese Embassy or Consular office in your own country or at Kathmandu Airport on arrival in Nepal. Currently, the easiest and best place to obtain a visa is on arrival at Kathmandu Airport. Visa application forms can be downloaded off the web and we will also send you a copy prior to your departure. You will need to get a 90-day visa which costs US$125. Once in Kathmandu, the expedition’s agent will provide an expedition permit to match. If you choose to get your visa at the Kathmandu Airport, you will need to have a passport photo handy.

**COMMUNICATIONS**

The expedition will be equipped with portable Thuraya satellite phone systems for the duration of the expedition in order to provide reliable email and voice communication globally for business, media or personal use. Limited satellite phone time can be purchased at the rate of US$3.00 per minute. Our broadband satellite Wi-Fi connectivity will be available once the expedition is underway and is included in the expedition fee on the basis of a fair use policy. Please contact our office for details.

**EQUIPMENT LIST & REFERENCE NOTES**

Expedition members will be sent a list detailing all the necessary clothing and equipment to be individually provided, contained within a set of Expedition Reference Notes with all the details for the trip. These notes provide extensive information on everything from suggestions of what type of camera to bring to training advice for your expedition preparation.

**MEDICAL EXAMINATION & INSURANCE**

Expedition members will be provided with a medical questionnaire by the expedition doctor and asked to visit their family physician to receive a full medical examination. This information will be sighted only by the expedition doctor and Expedition Leader and treated with full confidentiality. Advice on immunisations will be provided at this time. We also require members to have rescue insurance and we will consult with individual team members as to your insurance needs and solutions for coverage.
PASSPORT PHOTOGRAPHS

Expedition members will need to provide a digital passport photograph for climbing and trekking permits and a copy of their passport biodata page.

THE EXPEDITION FEE

The cost of the expedition, ex Kathmandu, is US$69,000.

This is an inclusive cost and covers the following:

- 1:4 Western Guide ratio and 1:1 Sherpa to climber ratio on summit day
- Bottled oxygen
- Personal equipment carried on the mountain
- Nepalese government royalty fees
- All expedition organisational requirements
- All climbing and trekking permits
- Fixed-wing air transport within Nepal
- All team equipment
- All expedition staff including Sherpa support
- All food whilst away from Kathmandu
- All supplies necessary to make a safe and strong bid for the summit

- Medical services from our Expedition Doctor
- Base Camp Wi-Fi (fair-use policy applies) and satellite phone facilities
- Internet dispatch page that is updated daily by guides and Base Camp staff, and semi-hourly on summit day
- dZi Foundation support for their “revitalize a village” programme—likely to include support for a Nepalese child’s education for a year.

The expedition fee does not include the following:

- Air travel to and from Nepal
- Hotel accommodation and meals in Kathmandu
- Nepalese airport entry visas
- Extras on the trek in/out such bottled drinks, showers and laundry
- Personal clothing and equipment
- Personal Insurance/Trip Cancellation Insurance/ Medical Evacuation Insurance
- Actual satellite phone calls
- Gratuities for guides and Sherpa staff.

PAYMENT DETAILS

All payments should be made by bank transfer to the following bank and account:

Looking back towards the Hillary Step and South Summit. Photo: Rob Smith
Bank of New Zealand
Offshore Branch
42 Willis Street
Spark Central
Wellington, New Zealand
For the account of Adventure Consultants Limited.

Account Number: 1000-594771-0000
Account Type: US Dollars
Swift Address: BKNZNZ22

NOTE: All bank transfer charges are for the remitter’s account.

We can also accept your deposit and balance payment by credit card (Visa, Mastercard and Amex) plus a 3% card charge.

DEPOSIT
A non-refundable deposit of US$15,000 is payable to secure a place on the expedition.

BALANCE
The balance of US$54,000 is payable in two instalments of US$27,000.
The first on 20 October 2020 and the second on 20 January 2021.

CANCELLATION & REFUND POLICY
An expedition member may cancel their participation on the following basis:

a) Prior to 20 January 2021, then on the basis of a 50% refund of the 20 October 2020 balance payment.

b) After 20 January 2021 but before departure to the mountain from Kathmandu then on the basis of no refund of any monies paid.

We strongly recommend you take out trip cancellation insurance via your travel agent if you wish to be covered against cancellation due to medical or personal reasons.

HOW TO JOIN THIS EXPEDITION
If you would like to join the 2021 Everest Expedition, please complete our online booking form and forward your deposit payment at www.adventureconsultants.com/expeditions/seven-summits/everest/book-now.
